

# About SUESSEN

Our company was founded in 1920 in Süßen, Germany. Since then, a small engineering workshop has grown into a renowned enterprise operating in all parts of the world.

Süßen remains the location of the company headquarters and the town can be found in the attractive hilly landscape of the so-called "Schwäbische Alb". This is at the periphery of the important industrial region of Stuttgart and combines both great recreation facilities with a solid economic infrastructure.

The key to our success is fairly simple as we see it - continuity, reliability, outstanding qualifications and extremely loyal and capable employees - and last but not least, a thirst for innovation!

At SUESSEN, we know that we must never 'rest on our laurels' - consequently, we perpetually strive to replace something that is great with something that is even better.

Working with the most state of the art manufacturing techniques and our drive to better the performance of our competitors has ensured the success of SUESSEN products in the global market.

However, we recognise that success can only be maintained and developed through continuing to employ highly qualified and motivated employees. Therefore, considerable importance is attached to the education and training of our employees. In the apprentice training school, junior employees are acquainted with the latest technology from the outset.
