

Products

At SUESSEN, we make considerable investments in Continuous Research & Development, combined with applied research that is directly carried out at our customers' mills. This ensures that we are able to further develop our technical and technological components in both an uncompromising and resolute manner.

In particular, we focus on universal applicability, improved yarn quality, increased service life, reduced maintenance and proven reliability in industrial application.

Our power in developing our products is evidenced by the most recent extension of our leading compact ring spinning system EliTe[®]CompactSet with EliTwist[®] and EliCoreTwist[®] and the state of the art Open-End SpinBoxes.
