Süssen, January 19, 2006

VDMA Symposia 2006
Bangkok, Thailand, February 06. - 07.
Bandung, Indonesia, February 15. - 16.

SUESSEN participates in VDMA Symposia 2006. In both events, SUESSEN Managing Director Mr. Peter Stahlecker will hold lectures titled: **"New Developments in EliTe® Compact Spinning Technology"**. Our decision to participate is based on our desire to emphasize the following:

- Our Technology Leadership in spinning
- The excellent SUESSEN product range
- The many benefits we provide for our customers in terms of improved technology and productivity
- Impressive return on investments achieved by the acquisition of modernization packages

SUESSEN - The widely acknowledged Leader in Compact Ring Spinning Technology and Open-End Rotor Spinning

At SUESSEN, we make considerable investments in Continuous Research & Development, combined with applied research that is directly carried out at our customers' mills. This ensures that we are able to further develop our technical and technological components in both an uncompromising and resolute manner.

In particular, we focus on universal applicability, improved yarn quality, increased service life, reduced maintenance and proven reliability in industrial application.

Our power in developing our products is evidenced by the state-of-the-art Open-End SpinBoxes for the OEMs RIETER and SAVIO and the most recent developments in compact ring spinning, such as EliTwist®, of which over 100,000 spindle have already been sold, and EliCoreTwist®.

Compact Ring Spinning Technology

The SUESSEN EliTe® Compact Spinning System was first introduced to the market at ITMA '99. In a short space of time, it achieved a reputation as being the most versatile compact spinning system. To

date, the EliTe® Compact Spinning System has benefited close to **1,500,000** compact ring spindles worldwide.

The EliTe® CompactSet is available for short-staple as well as for long-staple spinning. Further examples of our commitment to Technology Leadership are the recent releases of the new products in compact spinning as EliTwist® and EliCoreTwist®.

SUESSEN EliTe® CompactSet – The Third Generation The Compact Spinning System for existing ring spinning machines

The new Compact Ring Yarn, providing revolutionary advances in all yarn parameters, has already established new ring yarn quality standards. Furthermore, it has proven its important cost effective advantages in the ring spinning process and in downstream processes. The result of this product is an unparalleled improvement in the quality of the textile end product.

The SUESSEN EliTe® Compact Spinning System is available as modernization packages, called **EliTe® CompactSet-S** for existing ring spinning frames in short-staple spinning and **EliTe® CompactSet-L** for existing ring spinning frames in long-staple spinning.

The EliTe® CompactSet is available for many models manufactured by RIETER, Lakshmi, Shanghai, Jingwei, Zinser, Toyota and other manufacturers.

Our New Developments:

- EliTwist®** production of two-ply yarns directly on the ring spinning machine with compact spinning technology, setting new quality standards in the field of compact spinning
- EliCoreTwist®** production of two-ply yarns with core yarn directly on the ring spinning machine with compact spinning technology

SUESSEN ... market oriented solutions ...
