PRESS RELEASE

Süssen, June 26, 2006

SUESSEN co-operates with Marzoli in Compact Spinning Technology

The SUESSEN EliTe[®] Compact Spinning System, introduced to the market at ITMA '99, quickly gained the reputation of being the most versatile compact spinning system. To date, the EliTe[®] Compact Spinning System has been sold for over 1,500,000 compact ring spindles worldwide.

To strengthen the market position, SUESSEN started a co-operation with **Marzoli Spa**, the Italian manufacturer of spinning machinery. Marzoli Spa is member of the Camozzi Group.

MARZOLI will supply their compact ring spinning machines equipped with the EliTe[®] CompactSet, for which all technology components, including the new designed Top Weighting Arms HP-GX 3010, are delivered from SUESSEN.

On the occasion of the ITM 2006 exhibition in Istanbul, Marzoli will inform their customers about this co-operation and will present their new ring spinning model MPTN equipped with the EliTe[®] CompactSet.

With this co-operation both companies expect to extend their business and market share in the world market. The companies will also work together to deter possible infringements of their intellectual property rights for the benefit of their customers.

Both parties will strive to further enhance the leading position of the EliTe[®] Compact Spinning Technology in the worldwide textile markets.
